in various disciplines

Agrin at a glance

Who we are

We are a multidisciplinary group of people (agronomists, biologists, engineers and chemists) with expertise in many areas and with an innovative mindset.

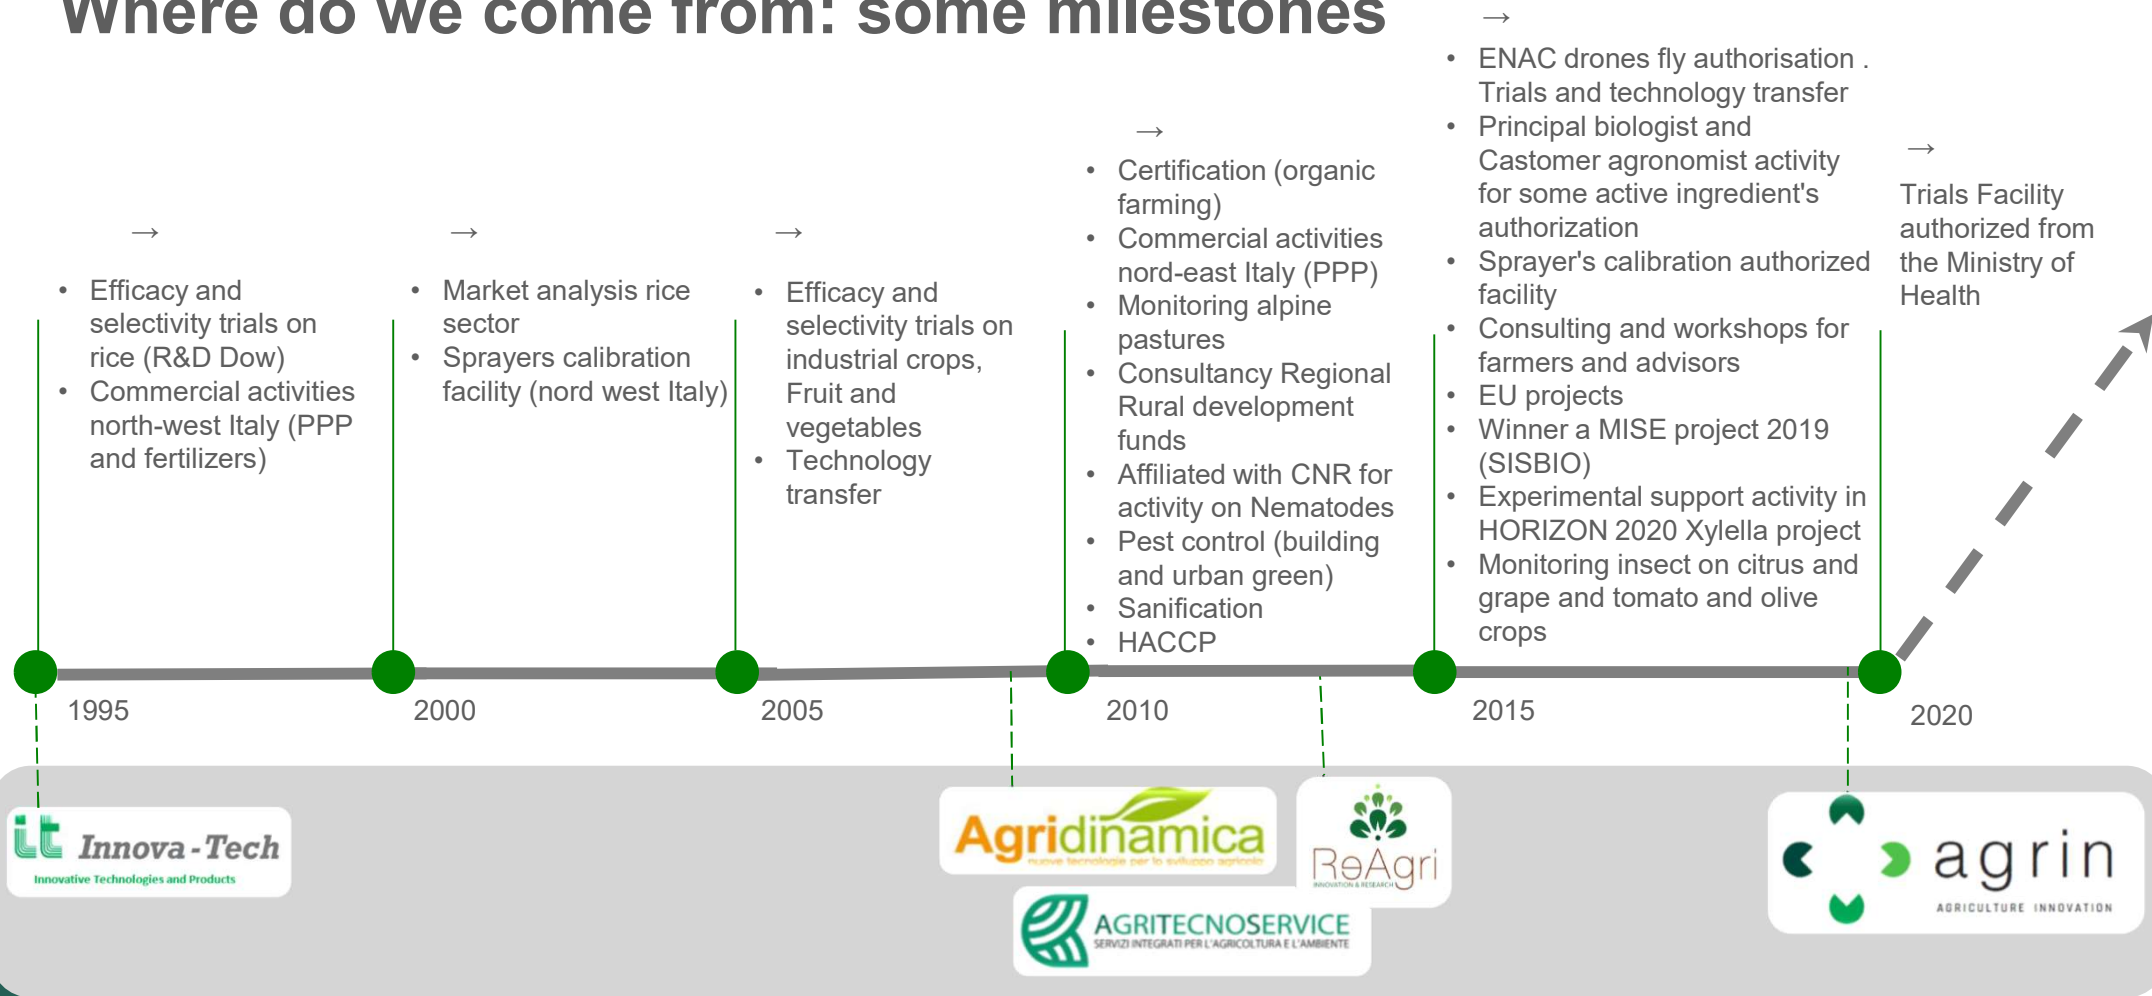

Our passion is to find solutions to maximize the economic, environmental and social sustainability of agriculture and agroindustry

Where do we come from: some milestones

ACTIVITIES

COMPANIES

Mission

*Closing the gap
between research
and farmers*

Mission

We want to bring innovation to the market, which:

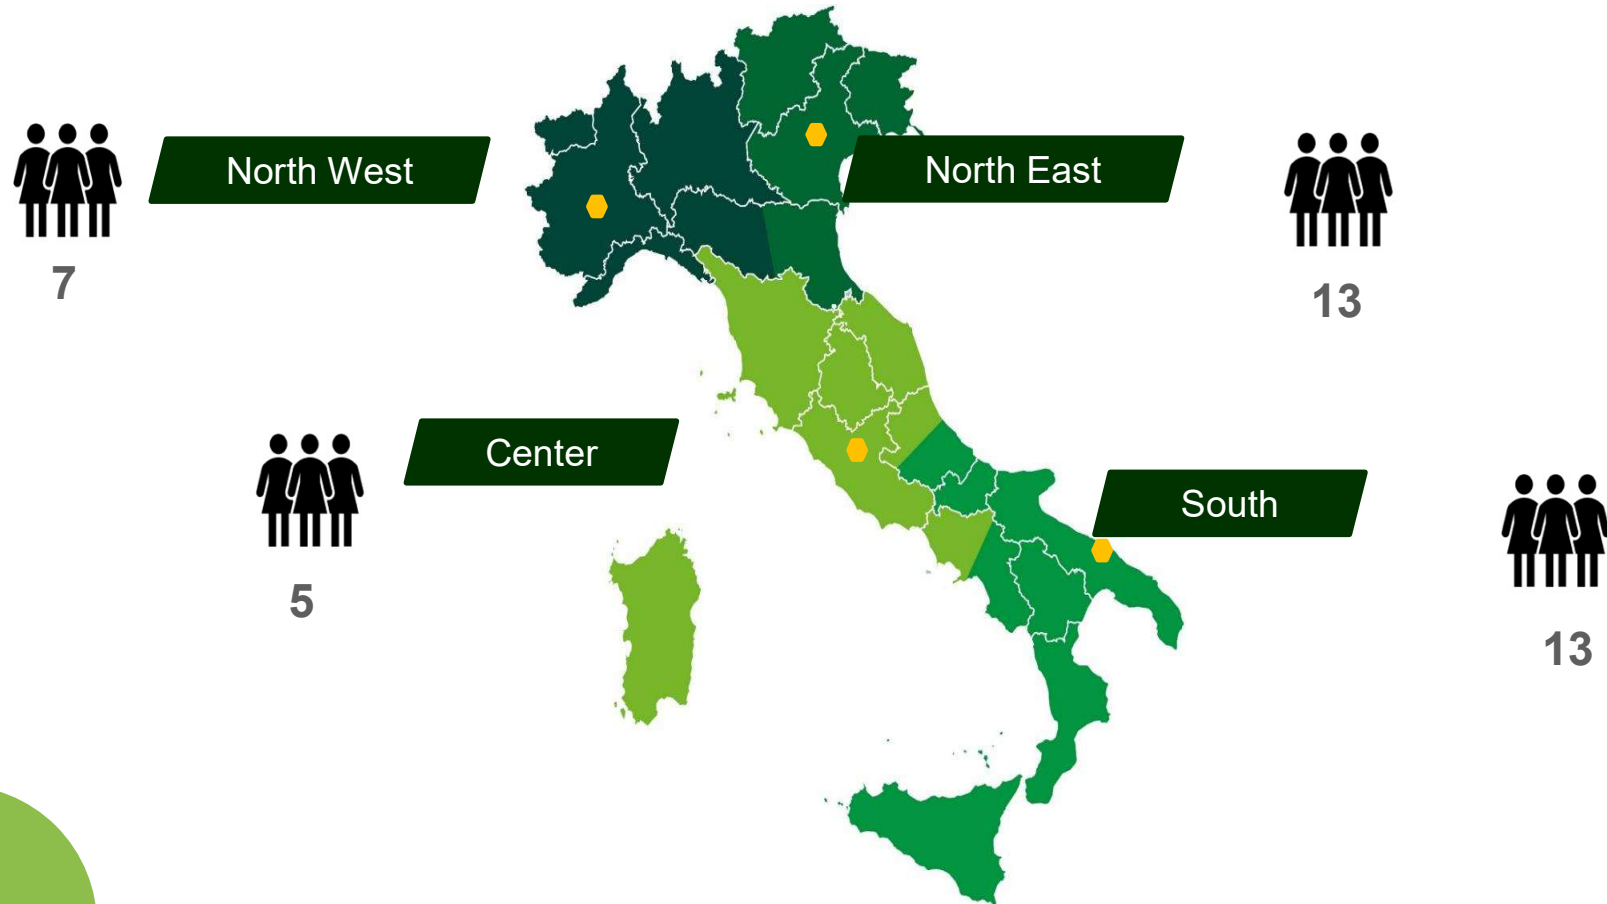

1. brings real benefits to farmers through:

- Improvement of the process efficiency
- Input's optimisation (fertilizers, water, pesticides, energy)
- Increased the value of the products

2. Reduces environmental impact

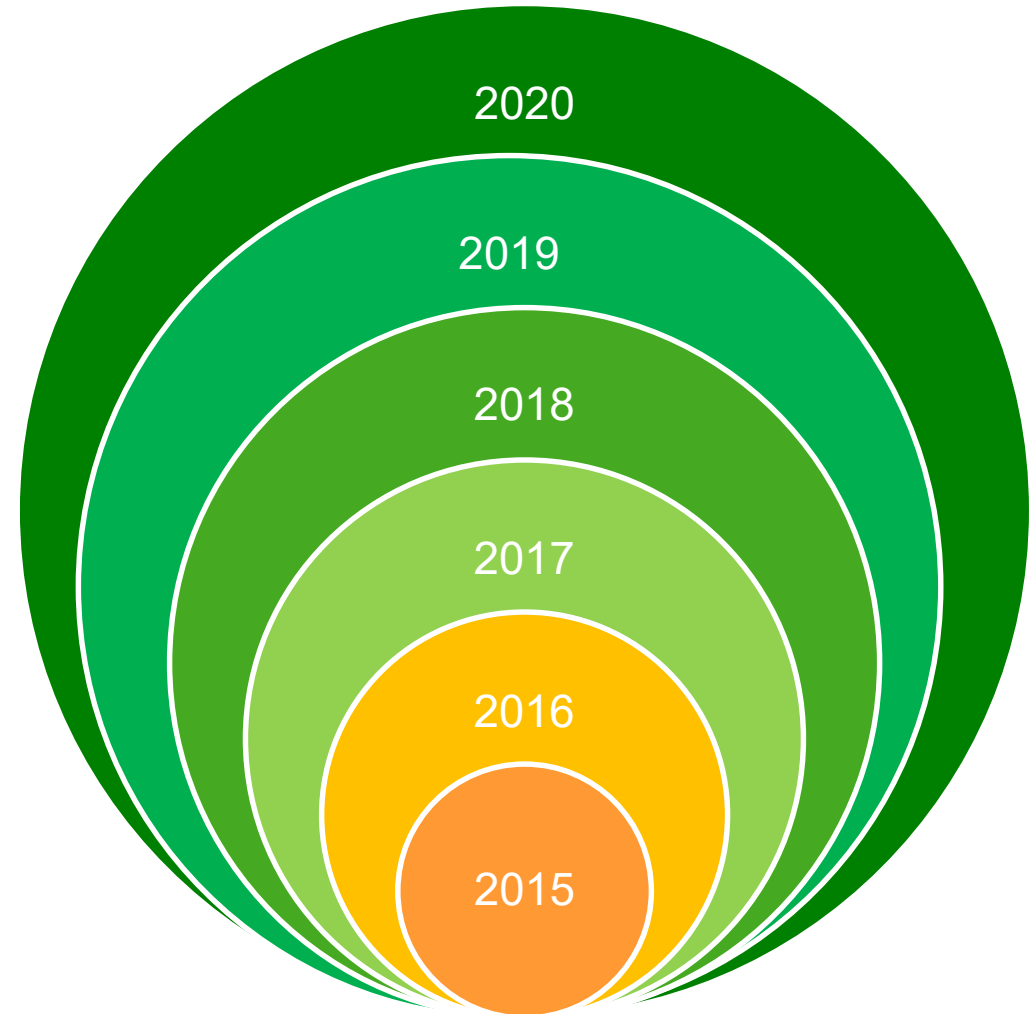

3. Usable in a short time

Where we are

Scientific activity

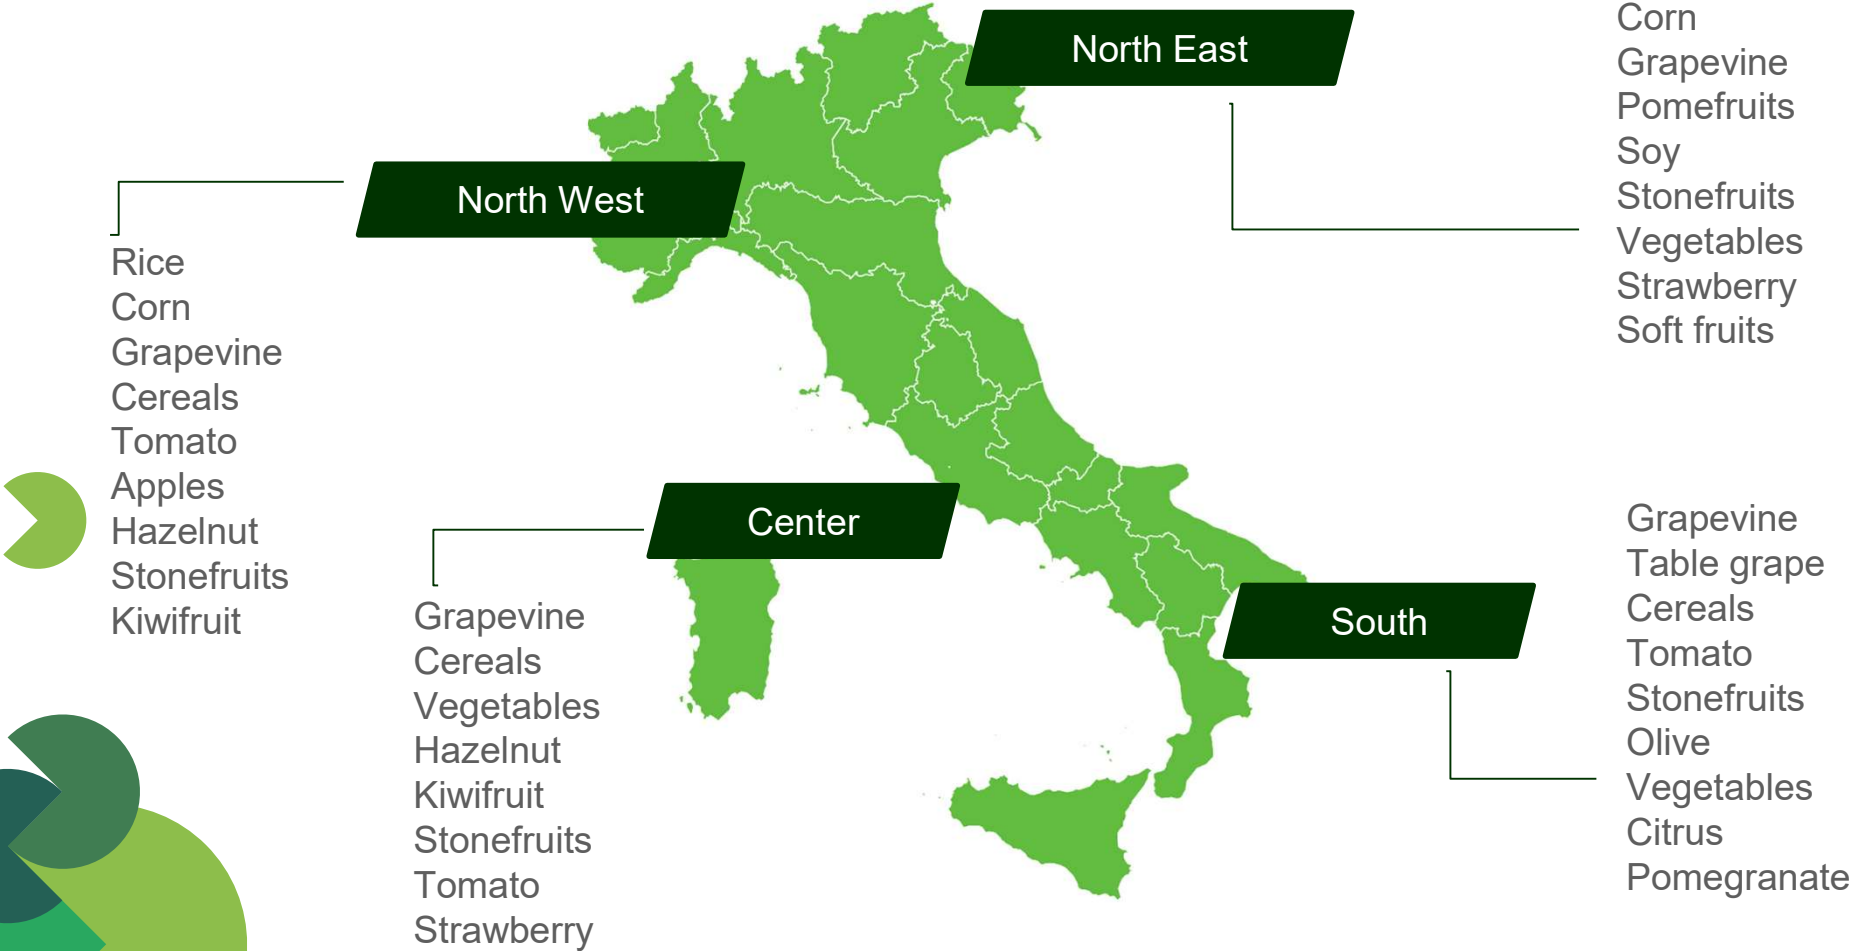

2020	3 scientific publications
2019	7 scientific publications 1 book
2018	18 scientific publications 1 book
2017	4 scientific publications
2016	6 scientific publications
2015	4 scientific publications

Network (scientific)

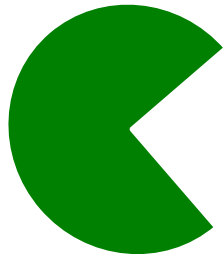

Network (farmers)

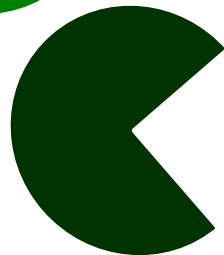

What we do

Agrochemical sector

Agronomy and pest management

Other services

What we do

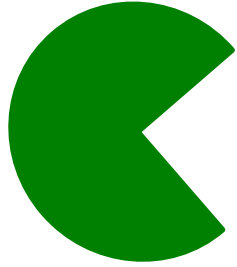

Agrochemical sector

Facility authorized from the Ministry of Health

- ◀ Discovery trials
- ◀ Selectivity trials on beneficial insects
- ◀ Varieties selectivity trials
- ◀ Baseline test
- ◀ Sensitivity tests on weeds
- ◀ Advocacy trials
- ◀ Insects rearing

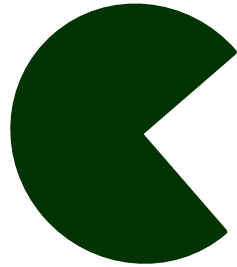

What we do

Agronomy and pest management

- Extraction of nematodes from the soil
- Insects and fungi identifications
- Seeds NIR analysis
- Germination test
- Seed bank
- Fruit and vegetables NIR analysis
- Soil NIR analysis
- Pest monitoring
- Varieties performance

What we do

Other services

- ◀ Workshops
- ◀ Technology transfer
- ◀ Advisor services
- ◀ Certification (organics, etc.)
- ◀ Market analysis
- ◀ Sprayers & tractors washing facilities (consulting, projecting and management)
- ◀ Consulting

Projects we are focusing on

- Sustainable solution to avoid point pollution (Agrobox®)
- Developing new biocontrol agents & biostimulants
- Implementing production protocols (wheat, rice, corn, etc.)
- Implementing sustainable food & nutraceutical production chains
- Precision farming tools & services
